Candidate Benefits of Working with Break the Box Solutions

Oh No! Not another recruiter!

“As a former overworked candidate I can relate to the lack of time and energy you have to look for a better opportunity. You want to take advantage of the opportunities that are out there but you don’t have the time. You want and need someone professional who will look out for your interests”

Lillian S. Keefe, Managing Partner

The following are reasons why you should use a recruiter and *specifically why you should choose Break the Box:*

- **There’s no cost to you.** The hiring hospital or company pays our fee.
- **You are in total control of our direction at all times.** It is not in our best interest to pursue openings for you that don’t make sense based on your current and evolving needs. We keep communication open so that we are truly your partner in the search process.
- **After you define the parameters of the positions that interest you, we’ll do all the searching.** We allow you to be comfortable with our approach by laying it out clearly.
- **Our national network of over 700 associate offices** gives us the reach to find openings almost anywhere. We leverage that benefit but as smaller associate offices are able to focus on issues like quality and relationships. Bigger organization can’t afford to do that since they are focused on volume.
- **Relax. Our search won’t impact your personal time.** We do our best to minimize wasting any of your time with unqualified openings. We also provide you with information in Newsletters, Job Alerts and our Knowledge Corner resources to allow you to passively remain informed on the job market.
- **We are employment specialists with extensive knowledge and experience in the healthcare.** We have experience in these high demand positions and the research and technology training to differentiate us from the pack.
- **Our search will be totally confidential. Your identity will be released only with your permission, when you feel it is appropriate.** Our commitment to your privacy is inline with the strictest of standards regulated today. Our forms are accessed via SSL (secure socket layer)...
